

Imagine a future of clean air, of children playing in the streets, of cities, towns and villages with food growing everywhere, more birdsong and wildlife, thriving local economies, imaginative and playful architecture, rewilded landscapes, clean free energy and our waters restored to purity. An age of connection, collaboration and community. A more resilient, more diverse, equal, caring, and fairer world.

What ifwe decided to be **Bold** and **Decisive** and put our energies into aiming at a future we are excited about instead of acquiescing to the single, prescribed **one** our government is rolling out in conjunction with the global 1% money machine, namely the **4th Industrial Revolution** also coined the Great-Re-Set?

See link below:

THE GARDENS OF HOPE FOOD AND WILDLIFE BELT

What if..... we intentionally set out **instead** of this 4th Industrial Revolution to co-create a new economic system united around a common threefold vision for **Soil, Soul and Society**?

What if this consisted of a food and wildlife belt that weaved and connected our local communities together across the country through a diverse and beautiful range of urban forest gardens, market gardens, allotments, forage areas, community orchards, Vineyards, micro-farms, medicinal gardens, oat fields, parks and playing fields, gardens, commons, forestry, paths, tracks, edible school yards, co-operative outlets and shops?

Gardens Of Hope aims to bring about through the localizing of our national food system a de-centralized home-grown, hand crafted form of production that establishes an **organic** relationship between producers, distributors and consumers.

Not mass production but production by the masses!

You can never change the corporate global 1% money machine 4th Industrial Revolution rollout by fighting up against it, to change it create a new and compelling vision from the bottom up that is grounded in real experience and make their manufactured fictions and illusions obsolete.
